

## Are you managing every detail?

Staying on top of your maintenance can be challenging and time consuming. It can seem like an impossible task to keep everything under control.

## That's why we offer Control & Correction

When you enlist NeroQom to complete this Discipline, we'll take over every aspect of the maintenance for you.

With an agreed time or budget at your project, the Squad will work through every space to find any problems, current or future, then fix where possible. We will then **let you know** what's been done and what's going to need to be done.

That's how we'll help you to get on top of your maintenance... and stay there.

## How does it work?

We've been completing Control & Correction programmes for our clients for a long time, so we know what we're doing.

When we're with you, the process is a **simple**, three in one solution:

- 1 We Clean**
- 2 We Fix**
- 3 We Document**

So, you'll know every issue which has occurred  
**and have peace of mind knowing that they've  
all been dealt with**

## What will it do for me?

Drafting the Squad in to take care of your maintenance has many benefits, some of our favourites include:

**Manage your budget:** *Being able to see what you're spending and what you'll need to spend from your budget lets you **plan more effectively**.*

**All bases covered:** *It doesn't matter what the issues is or what the material is, we've got a Discipline to get it **looking like new again***

**Information is power:** *We'll let you know everything we've done and everything we need to do, keeping you **up to date** with every little detail of your project.*

**Rapid Results:** ***Don't wait** for your customers to let you know there's a problem. We'll find it and fix it before you get a single complaint.*

**Peace of mind:** *With NeroQom taking care of your project, you can sleep well knowing that we've **got it covered**.*

## But what can NeroQom® actually do?

Well, we're glad you asked. We have something truly unique to tell you what we can do, it's called our **Discipline Menu**. Each Discipline is a tested and proven combination of cutting-edge products and techniques which give world-beating results.

There are about 100 Disciplines on our current Discipline Menu, but we're finding new ones to add all the time.

## So, head on over to our website

and see the list of everything we will be taking care of for you:
