

## Why doesn't it look clean after it's been washed?

It's the simplest thing in the world to wash a prestigious building or superyacht, right? You know as well as we do that it's not as easy as some people think.

There's an art to even the simplest wash. Just making it wet then dry isn't the answer. Choosing a partner without this knowledge can be costly.

**For example**, if your window cleaner doesn't know the impact that reverse osmosis water has on anodised aluminium or how their detergent will impact delicate surrounding materials? You'll find out the effect soon enough and have an expensive restoration bill as well.

Still, if you're prioritising cheap over quality, you'll have budget left over to pay this bill.

## More than making it wet then dry again.

NeroQom offers a comprehensive range of wash options to get the best results on any material or in any location. Our Wash Discipline includes options for:

- *A advanced wash*
- *A basic wash*
- *A check-up wash*
- *Microfiber wash*
- *Reverse osmosis wash (don't worry, we know what we're doing with this!)*

Choosing from our Disciplines will enable you to get the **perfect wash** for your project. We'll customise the wash to meet the specific needs of you, your building and budget.

No matter which exotic materials your architect chose, **we've got the experience to take care of it.**

## The Squad is experienced and qualified to deliver a professional service to the highest standard.

No matter the environmental, security or accessibility needs of your building, we will deliver every time.

## We thrive on partnerships!

NeroQom isn't about completing the job and going home. We **prefer** to work in partnership with our clients over a longer term. Whether from design, the start of construction, exploitation or every day after, we're there.

By coming back, we will be able to give you consistently **great results** but also to let you know if anything changes in the nature or condition of your project.

This can really help you fulfil your warranty obligations in the short and long term. Just let us know what extra needs to be done and we'll make sure it's taken care of.

**We offer regular, repeat treatments, not just one-off visits.**

So, if you would like quarterly visits to your project to keep it look its best, we'll be more than happy to help. Those don't even need to be the same type of Discipline each time, so if you would like us to complete a core wash on alternate visits that's not a problem at all.

## What if it needs more than a simple wash?

We have an extensive **Discipline Menu** which covers the huge range of different products, services and solutions we offer. That means that if you need more than a simple wash, we're ready to deliver high-end maintenance to restore and protect your building for the future.

For full details of our freshest Discipline Menu please **check out our website at the address below:**
