

## Turn back the clock on your glass.

Glass has come a long way. It's being used in prestigious buildings and superyachts in ways which were unimaginable when we started working with it nearly 30 years ago. It's not just closing the wall; glass creates the most beautiful designs.

It's also one of the easiest ways to see when your building needs attention, clearly showing when it's not clean or unloved. The condition of your glass can also show symptoms of bigger issues within the façade.

Glass needs your attention at every step; production, transport, storage, construction, if care isn't taken you can easily compromise your glass. You need to give it attention at every step to make glass the focal point of your project.

Without project dedicated cleaning methods, used at the correct frequency, you will quickly compromise the transparency, value and visual comfort of your glass.

**Who do you turn to so that this is never an issue for you?**

## The war on replacement.

When you love glass as much as we do, you want to take special care of it. That's why you need NeroQom.

We've been looking after many amazing glass structures for a long time and that's given us the experience to help you tackle **the real enemy**.  
*replacement.*

Choosing NeroQom as your partner is the surest way to avoid the cost and inconvenience of replacement. Gaining access to our exclusive professional, deep cleaning treatments will save you **time and money**.

Glass Restore will give your glass an extreme makeover, making it **like new**. It doesn't matter what the damage or contamination is on your glass, we have the Discipline to do the job. Even on the most damaged and compromised surfaces, we'll help you experience new again.

That's for every type of glass, even coated or tinted, which traditional abrasive or acidic treatments would destroy.

Bringing our market leading Discipline to your project will handle all **causes** of degradation, including:

- Limescale
- Chalk
- Concrete
- Oil
- Silicone
- Glue
- Graffiti
- Failed product & technique attempts by others
- All types of contamination including in manufacture, construction and exploitation

We partner with glass manufacturers to ensure the quality of their product from the moment it leaves the factory. Enabling them to ensure quality and consistency for their clients across large deliveries. They trust us with their glass and their clients, recommending NeroQom to clients for aftercare and high-end maintenance.

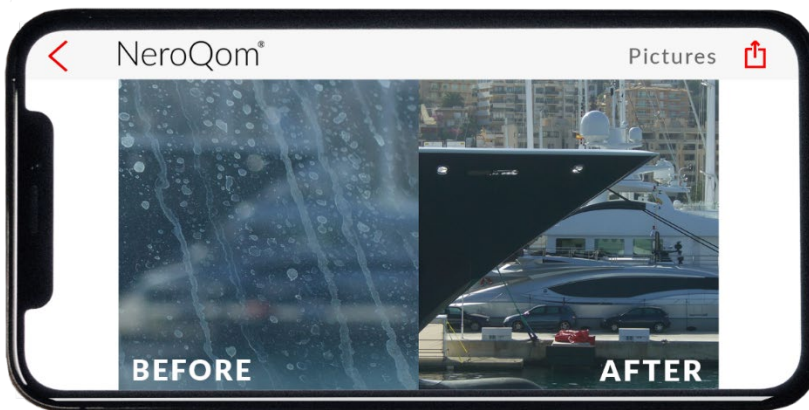

## Transparent results, not more problems.

Since 2001, NeroQom have been the pioneers of pH -neutral, non-abrasive products which use emulsifying technology. This is unique in an industry which still relies on abrasive or acidic chemical treatments which give long term issues for the users, clients, damages the surroundings of their project and can harm the poor workers who apply it.

**That's not the standard we set for our clients.**

As the **Architects** of high-end maintenance, our Disciplines are different in both concept and design. Glass Restore was one of the first Discipline we developed in 2001. It was created to improve your visual comfort, so it won't hurt your precious glass, delicate materials in the surround, the environment or users.

It's **ready** for rapid deployment inside or outside, at heights and in all situations, no matter how exceptional. Including for commercial or residential projects, even in food preparation locations as well.

Glass Restore is also perfect for **marine environments**; our superyacht clients rely on it's great results and have done for years.

You won't find a more **flexible** or **effective** treatment anywhere else.

## Part of a complete answer.

Restoring your glass is part of a picture, not the whole story. Whilst restoring the condition of your glass we can, for example, look after your façade or deck at the same time.

NeroQom offers a comprehensive range of Disciplines to offer the same amazing results to every detail of your project.

If you'd like more information on our full suite of impressive Disciplines to see what they can do for you, **check out the latest menu on our website:**
