

Have you upgraded your glass?

Glass is amazing at showcasing a stunning view... and highlighting every imperfection.

What is super for a yacht is super for a prestigious building. Our **quality** is proven at rough seas as well as in shower cabins.

For your **superyacht**, no one wants to see salt water stained or limescale contaminated glass. Worse still is cloudy or smeared glass caused by inappropriate treatments. It's not just the view to the outside world, but throughout the ship. Mirrors, dining areas, shower cabins and every other glass surface can be ruined if not properly maintained. But with all the glass on superyachts, it takes a lot of time and energy to keep her looking as good as she should.

When it comes to a **prestigious building**, contaminated glass can ruin the impact and look. Those first impressions matter. You'll need to be on top of the cleaning and maintenance of your glass to keep it in the best possible condition. It's expensive and time consuming to deliver the standard people expect.

Intelligent Glass Protection.

Glass Upgrade Protect changes the game for glass maintenance. Our Discipline is based on **NeroQom Molecular Tension Technology**, or NMTT, which will restore the condition and reduce the time spent on maintenance.

It's as simple as that.

Our **trained Squad** will apply our NMTT, optimised protector to your professional prepared, deep cleaned glass to give it armour against degradation. It works by sealing the surface pores, making your glass perfectly smooth and giving dirt nowhere to stick.

In fact, once in place, the upgrade makes your glass:

- *Hydrophobic*
- *Dirt repellent*
- *Anti-corrosive*
- *Improved visibility*
- *Easier to clean*
- *Anti-graffiti*

All from one Discipline.

The treatment can also be customised to your specific project.

The NeroQom Squad can analyse your glass to adjust Glass Upgrade Protect to get the best results for you. It's one of the many benefits of working with experts.

We're **frequently asked** to upgrade the glass in bathrooms where poorly, unprofessionally treated glass shows the everything it's been through, the whole story since it was made. The products used, cloths, tape, chemicals... it can be a mess on mirrors, windows and shower cabins. Our upgrade will not only make these easier to clean but reduce the impact of chemicals such as shampoo, soap, conditioner and toothpaste.

You can also benefit from our comprehensive **aftercare plan**; just follow our Expert Manual and you'll even **earn** a warranty. Once in place this will ensure that you see the benefits of this great Discipline for a long time to come.

One Discipline, a thousand uses.

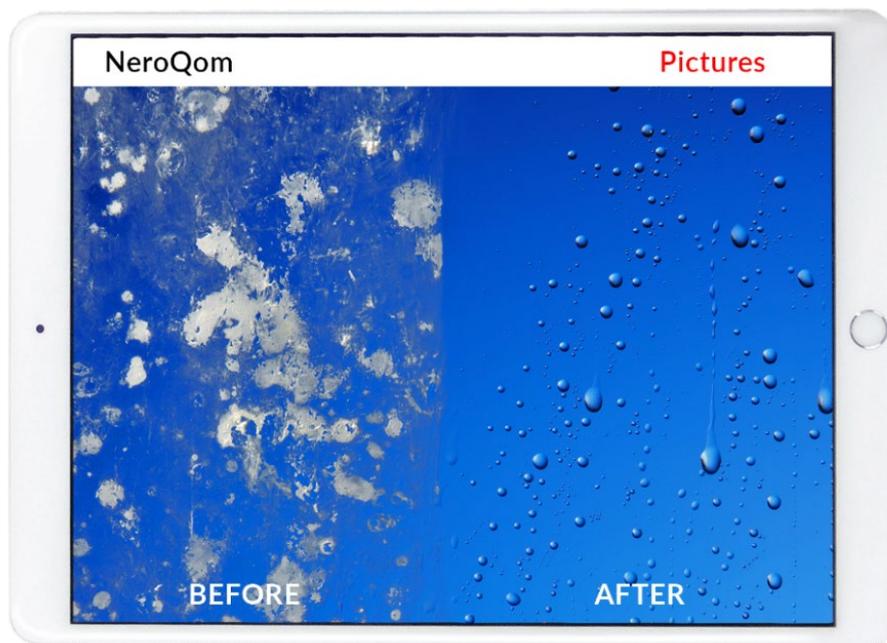

Even we're impressed by the range and variety of glass which benefits from this amazing Discipline. We've used this **flexible treatment** on zoo attractions, hotel shower cabins, swimming pools, villas, air traffic control centres and throughout the world's most beautiful superyachts.

Whilst each of these may seem completely different, they all benefit from the Glass Upgrade Protect Discipline. Why? Because they all need beautifully maintained glass which is **easy to clean**.

Reducing the time taken in a cleaning session will greatly improve the **visual comfort** for your guests and gain time for your team by **reducing cleaning time**. You'll also be able to use much less aggressive cleaning products, just our Power Water to get the job done.

The flexibility of the Discipline means that it will impact the quality, luxury and safety of your project. If you think your project could benefit from some protection, you're probably right.

Call the Squad in to take a look.

Beyond the upgrade.

NeroQom offers a comprehensive range of Disciplines for the care of your glass and all the other materials in your project.

If you'd like to know more about the Disciplines we offer,
