

## Normal isn't always standard.

Maintaining your prestigious building or superyacht is never easy. It's a constant battle against the environment, materials and design choices whilst balancing your budget and team.

No matter how on top of the process you are, there will always be those surprise problems. A renovation which introduces a new material. An issue you've never seen before.

Trying to tackle these in the same way as you do everything else can cause more damage than it fixes. But ignoring it can be even worse.

So, how do you fix a problem you've never seen before? How do you maintain a material that's new to the project? NeroQom.

## Instant expertise.

When you hit a challenge you've never seen before, don't guess. Call in the NeroQom Squad to support your team. We'll help you identify the best way to **maintain** your project, taking into account every detail whilst bringing our **years of experience** to bear.

Working with NeroQom will open a wealth of **unique** expertise to you and your team. We can be on hand to provide advice and input on a specific issue or to develop long-term maintenance regimes for your project.

When we come to you, we can even bring all the **equipment** and products your team needs to get the job done. They'll be selected from our Disciplines, so you know your team will be working with the best tools in the world.

Our Supervision Discipline is extensive and includes:

- *Trouble shooting issues*
- ***Locating** the source of damage or contamination*
- ***Developing** effective maintenance plans for your project*
- *Effective maintenance of unusual materials*
- *Training your team in the latest, cutting edge **techniques***
- *On-site supervision to ensure effective **treatment** and use of products*

But that's just the start of how we can help.

**Let us know what you need, and we'll work with you to find the right answer.**

## Call us in.

The NeroQom Squad is available throughout the **world**, where you need us, when you need us. Our supervision services are flexible and can be customised to your exact needs.

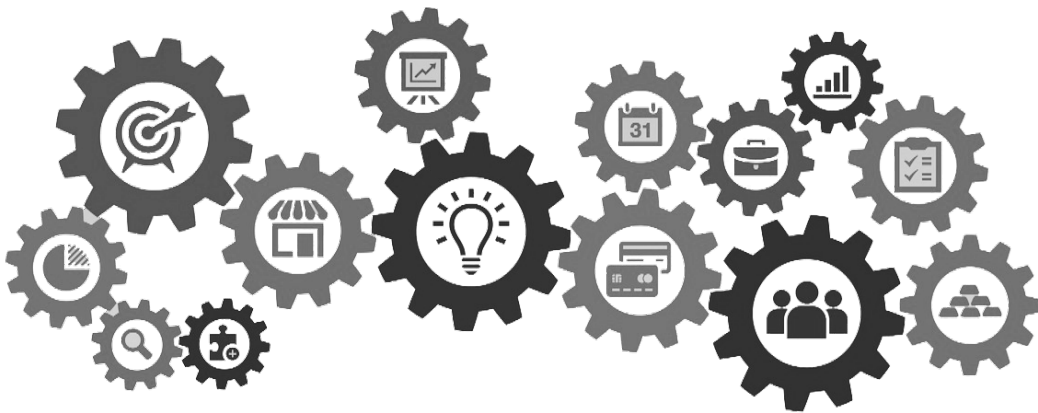

We prefer to start with a consultation which lets us know exactly what you need. Just drop us a line with exactly what you'd like to achieve, and we'll work with you to get it done.

If there's a specific issue or contamination you'd like us to resolve with you, give us images and as much information as you can.

We'll work out what's happening, pick a Discipline to resolve it, then head to your site to teach your team to fix the issue. We'll even stay to supervise any treatment with your team, if needed.

Sometimes we come across new materials or issues, things we've not seen before. We'll happily work with you and the manufacturers of the affected material to develop a **new solution**. That's right, we'll design a whole new product and technique for application if needed.

**Just pass the issue  
to us and we'll work  
it out for you.**

## The answer is always to hand.

When you work with NeroQom, you always have the answer you need. Our Discipline Menu covers every product and technique you need to achieve the best results on your project.

Look at the latest menu on our website, then let us know how we can help.

## It's what the Squad is here for.
